PROJECTS

Communitr3e (*Laravel PHP, MongoDB, VueJS, Bootstrap*)

- Developed a Laravel MVC web application while using MongoDB as database to provide a complete solution for international students seeking admission at Conestoga College
- Designed the GUI of the application using Bootstrap and made components using VueJS
- This site is designed to comply with Accessibility for Ontarians with Disabilities Act(AODA) requirements for websites

Personal Blog (*ReactJS, Gatsby*)

- Used ReactJS and Gatsby to design personal blog posts
- Made blog posts using Markdown files
- Link to the blog - vaibhavi-more.netlify.com/

Group Holiday Planning (*HTML5, XML, ASP.Net, Android, SQL*)

- Developed a web and mobile application for traveler/tourist to give accurate and up-to-date information regarding all the tour concerned factors
- The application comprehensively manages basic aspects of a touring application, such as authentication, member Registration process, scheduling, currently active tours, etc.
- Mobile application contains features like text-to-speech, track location via GPS to enhance user experience

Tutor Help Android Application (*Android, Firebase*)

- Developed an application for the students to get academic help from other students
- Implemented a dashboard where you can post questions, list the existing questions posted by other users and answer any of the questions
- Used Firebase to create database and store user related data
